Projects that do NOT receive a Chapter Award will still be considered for the National competition and may also be forwarded on by the judges.

If your project is selected as a Chapter Award winner, you will be asked to provide a one-page Press Release, in electronic format, that clearly and concisely describes the project and its value to the community and highlights why the project is worthy of special recognition (innovative engineering, challenges faced, overall social impact, etc).

PLEASE NOTE: If the community in which the project was complete has a population less than 75,000, please use the Small Cities/Rural Communities forms on the APWA National Website listed above.
